

(i) The chart shows where the sound would start and the path to each station. A blue line is a clear path. An orange line goes over an undersea ridge. A grey line is stopped by land or a shelf. The purple box is a test that we did after we saw the data.

(ii) Geometry only, no posterior. Sea-level 7th arc R600 BTO 18,400 us, m0019a. GEBCO_2026 15 arc-s along WGS84 geodesics, last 50 km before each receiver excluded; rule: land or >10 km above 200 m or >100 km above 1,000 m = blocked; minimum depth <1,500 m = partial (loss not computed). Physics: no TL. Royer events from LDO-201608 Table 4. Purple box: exploratory free fit of H01W 00:54:30 + bearing + S-SEIR + MAD picks (not pre-registered). Excluded: NE-AMS (lost).
