
Probability density of the impact latitude on the 7th arc from the drift model alone (twelve items, two ocean models with equal weight, prior uniform along the arc, smoothed along the arc), for three treatments of the Mossel Bay engine cowling item, against the satellite communication and flight data (grey area; Davey model with the fuel model; no measurement at 00:19 used). The Australian Transport Safety Bureau gives 22 March 2016 as the date on which the item was found; a photograph supplied to the Bureau in May 2016 is dated 23 December 2015. The absence of finds on Australian coasts is not used. Medians (degrees south): satellite and flight data 36.4; item dated 23 December 2015 30.0; item dated 22 March 2016 30.8; item excluded 32.9. Disagreement with the satellite and flight data (standard deviations): 1.6; 1.4; 0.8.
