

Ocean choices move floated classes by up to ~25% and dense ones by up to 10%; seabed and density by <1.5%

(a) dot = reference-289 p50-latitude impact point 36.875 S, 89.125 E; line = range over four points (reference-289 end-of-flight sweep, option none/other: p10, p90 latitude and densest cell; dive class, glide PROVISIONAL-OVERNIGHT).
(b) median over the four points of variant + baseline at matched draws 0–511; printed where ≥5% from 1. Baseline: GLORYS12V1 column and surface current, ERA5 wind, AusSeabed/GEBCO.
Breakup table PROVISIONAL (educated estimates); baseline 1,024 draws per point and family.
