

(a) 00:11 position of V2 descents descending at 00:11
(< -300 ft/min), weighted by 23:15 BFO + 00:11 BTO/BFO; ESS 1,722

(b) along-arc PDF of the 6th-arc crossing, V2 descents descending at 00:11

Runs: eof-2241-tr-v2-s1, eof-2241-tr-v2-s2 (V2 from core 'reference-289' hand-off m2241, prior track 289.7 deg; 100,000 parents x 2 children x 4 descents per seed). Position and vertical rate at 00:11 are the module's own flown state (latent:state_m0011_*). Descending = vertical rate < -300 ft/min at 00:11. Cruise-at-00:11 trajectories (onset later) are core-flown then and not shown. Labels: SMOKE; UNCORRECTED FUEL; PROVISIONAL SAMPLER (22:41 population before core request 17). ICAO EEDB Trent 892 idle floor; point-mass descent; Boeing-calibrated glide band. Code 9fdad5fb-dirty.
