

Conditional impact dynamics and energy

P primary conditional release proxy F fuel-history sensitivity A attached-flow aerodynamic sensitivity C uncontrolled-lift sensitivity E effective-feed chronology sensitivity

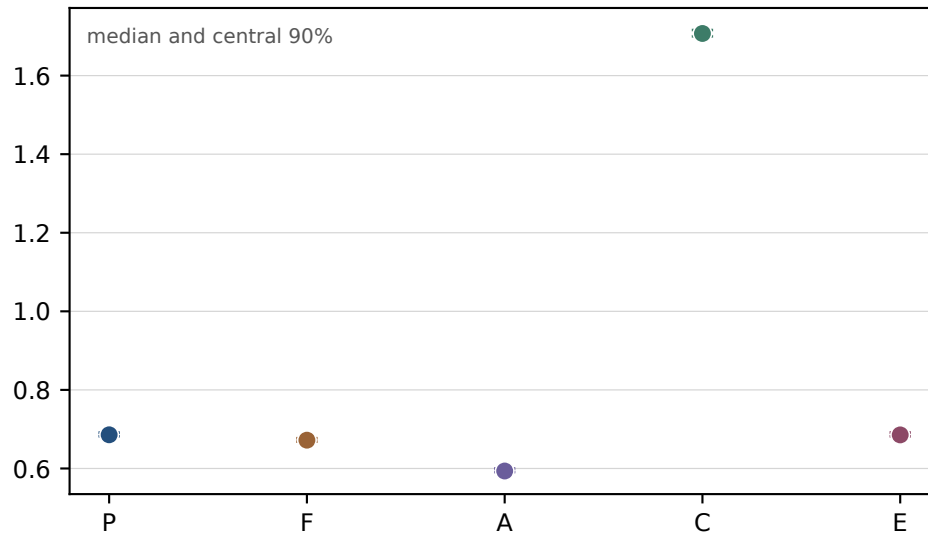

Impact time after 00:10:59 (min)

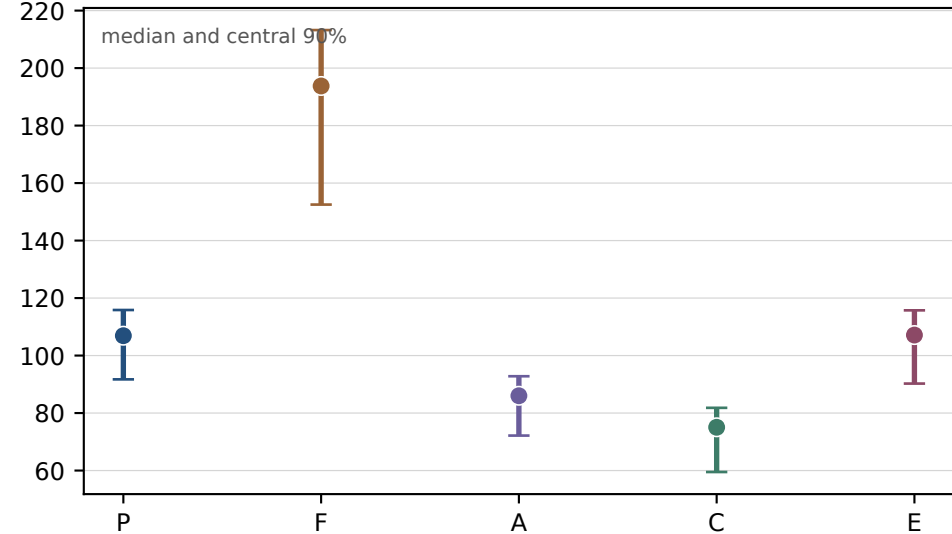

Downward impact speed (m/s)

Total kinetic energy (GJ)

Displacement from 00:11 (NM)

These intervals are within-family Monte Carlo summaries. They are not uncertainty across calibrated B777 terminal model families.
