

Diego Garcia H08S: periodic airgun-proxy filtering of Kadri Figure 9

Figure 9d: 01:00–01:10 UTC
period 9.927 s; mask 65.7% of samples

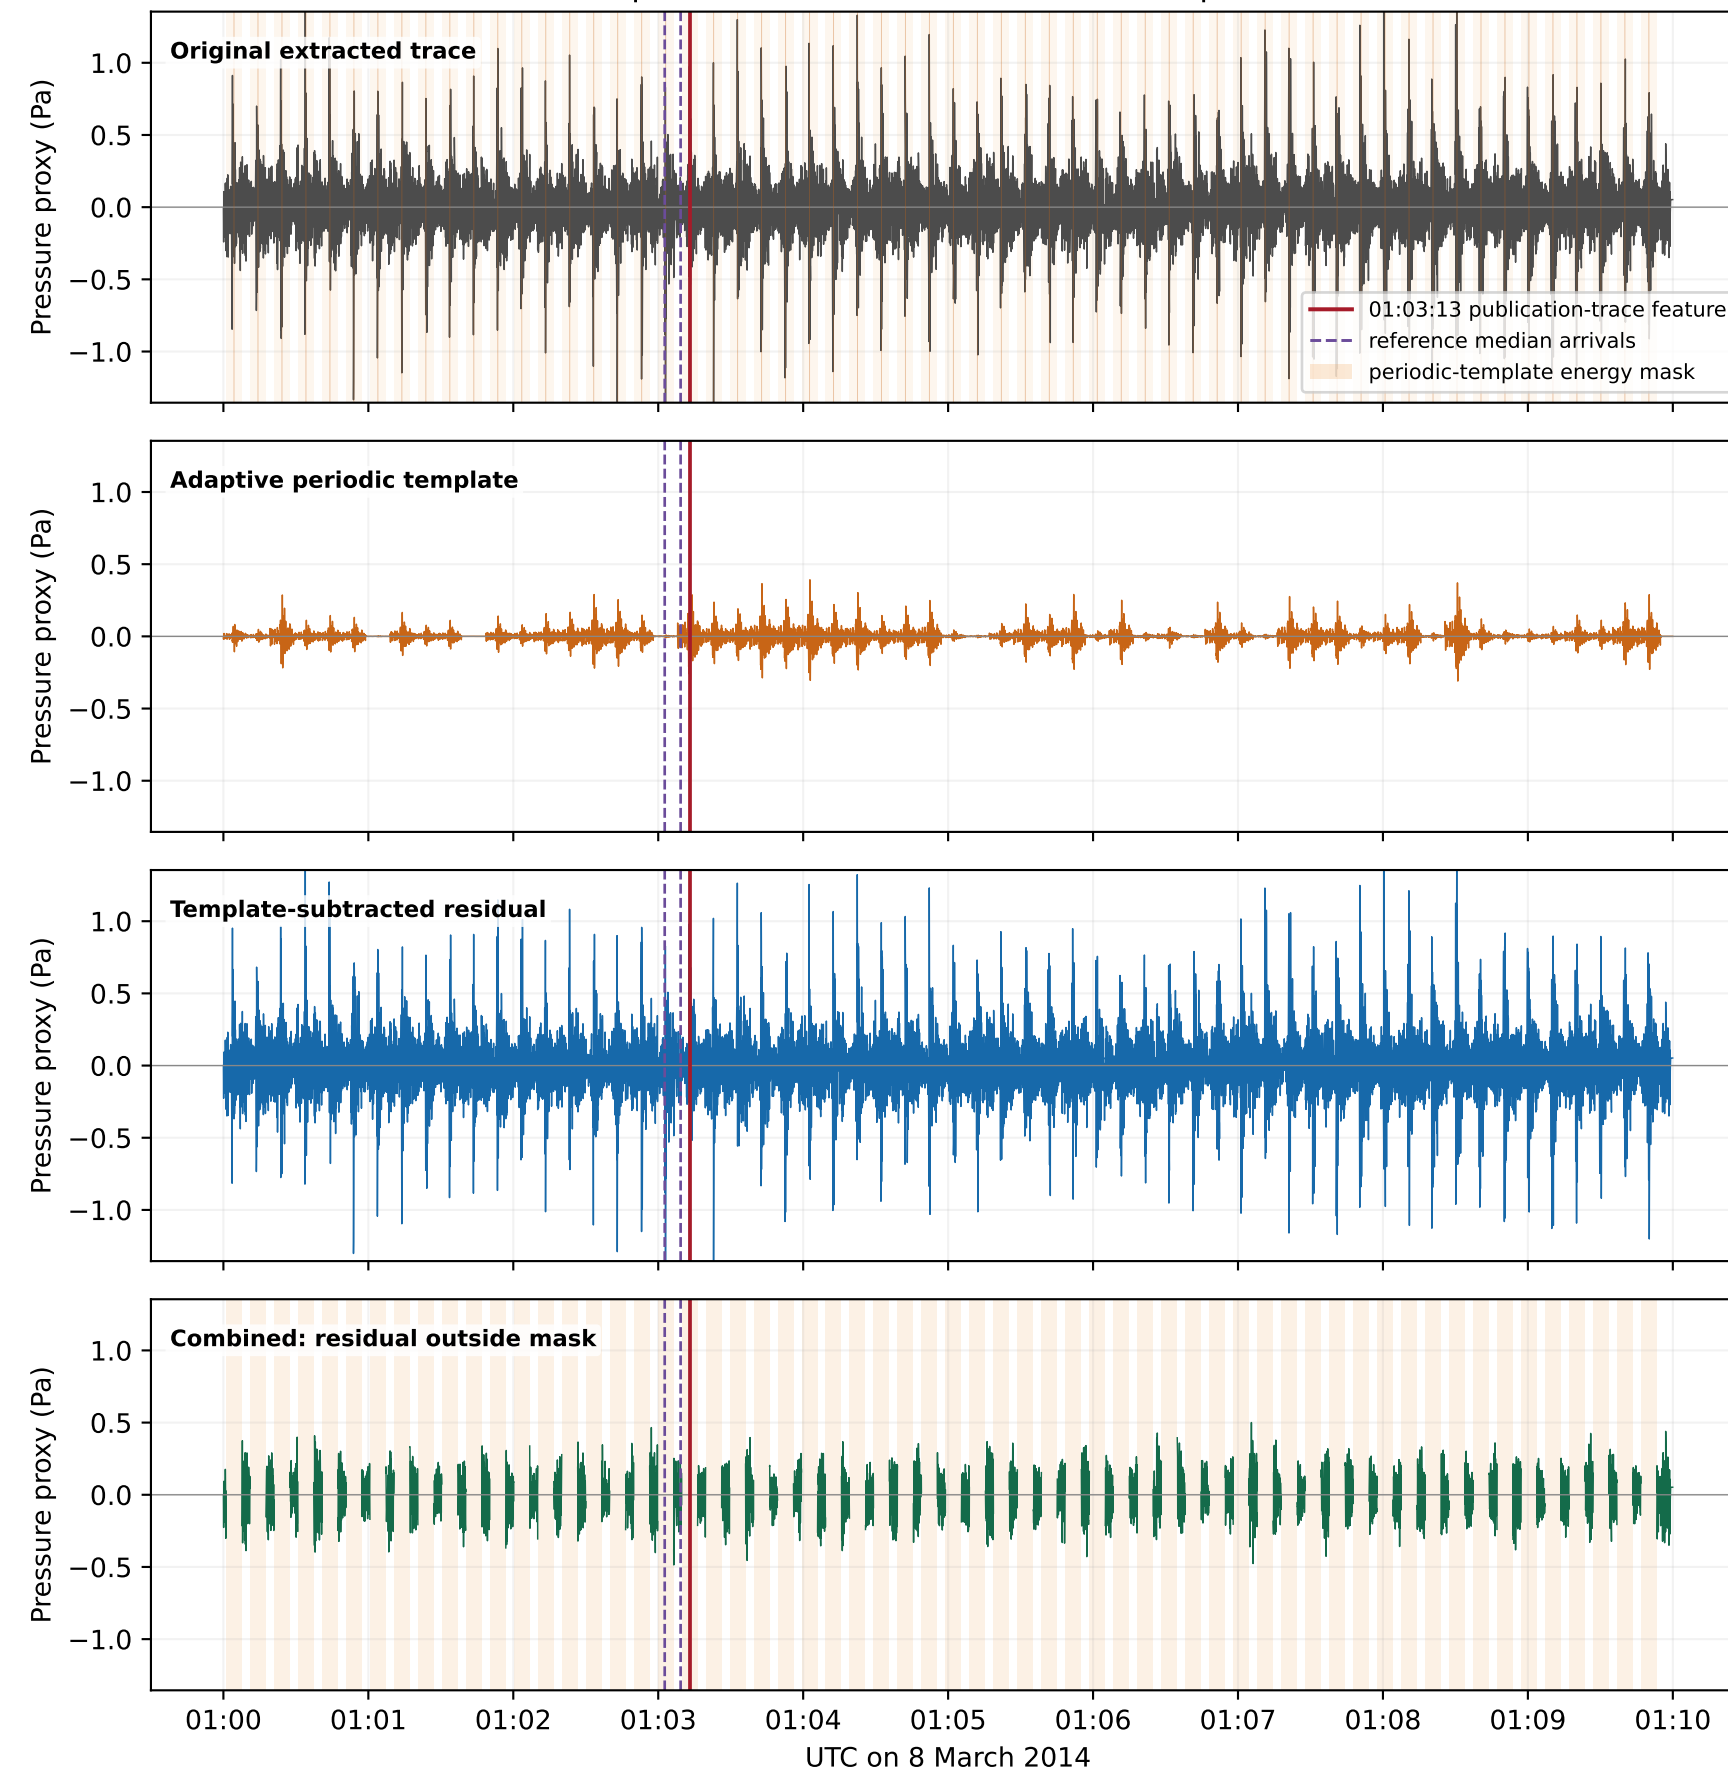

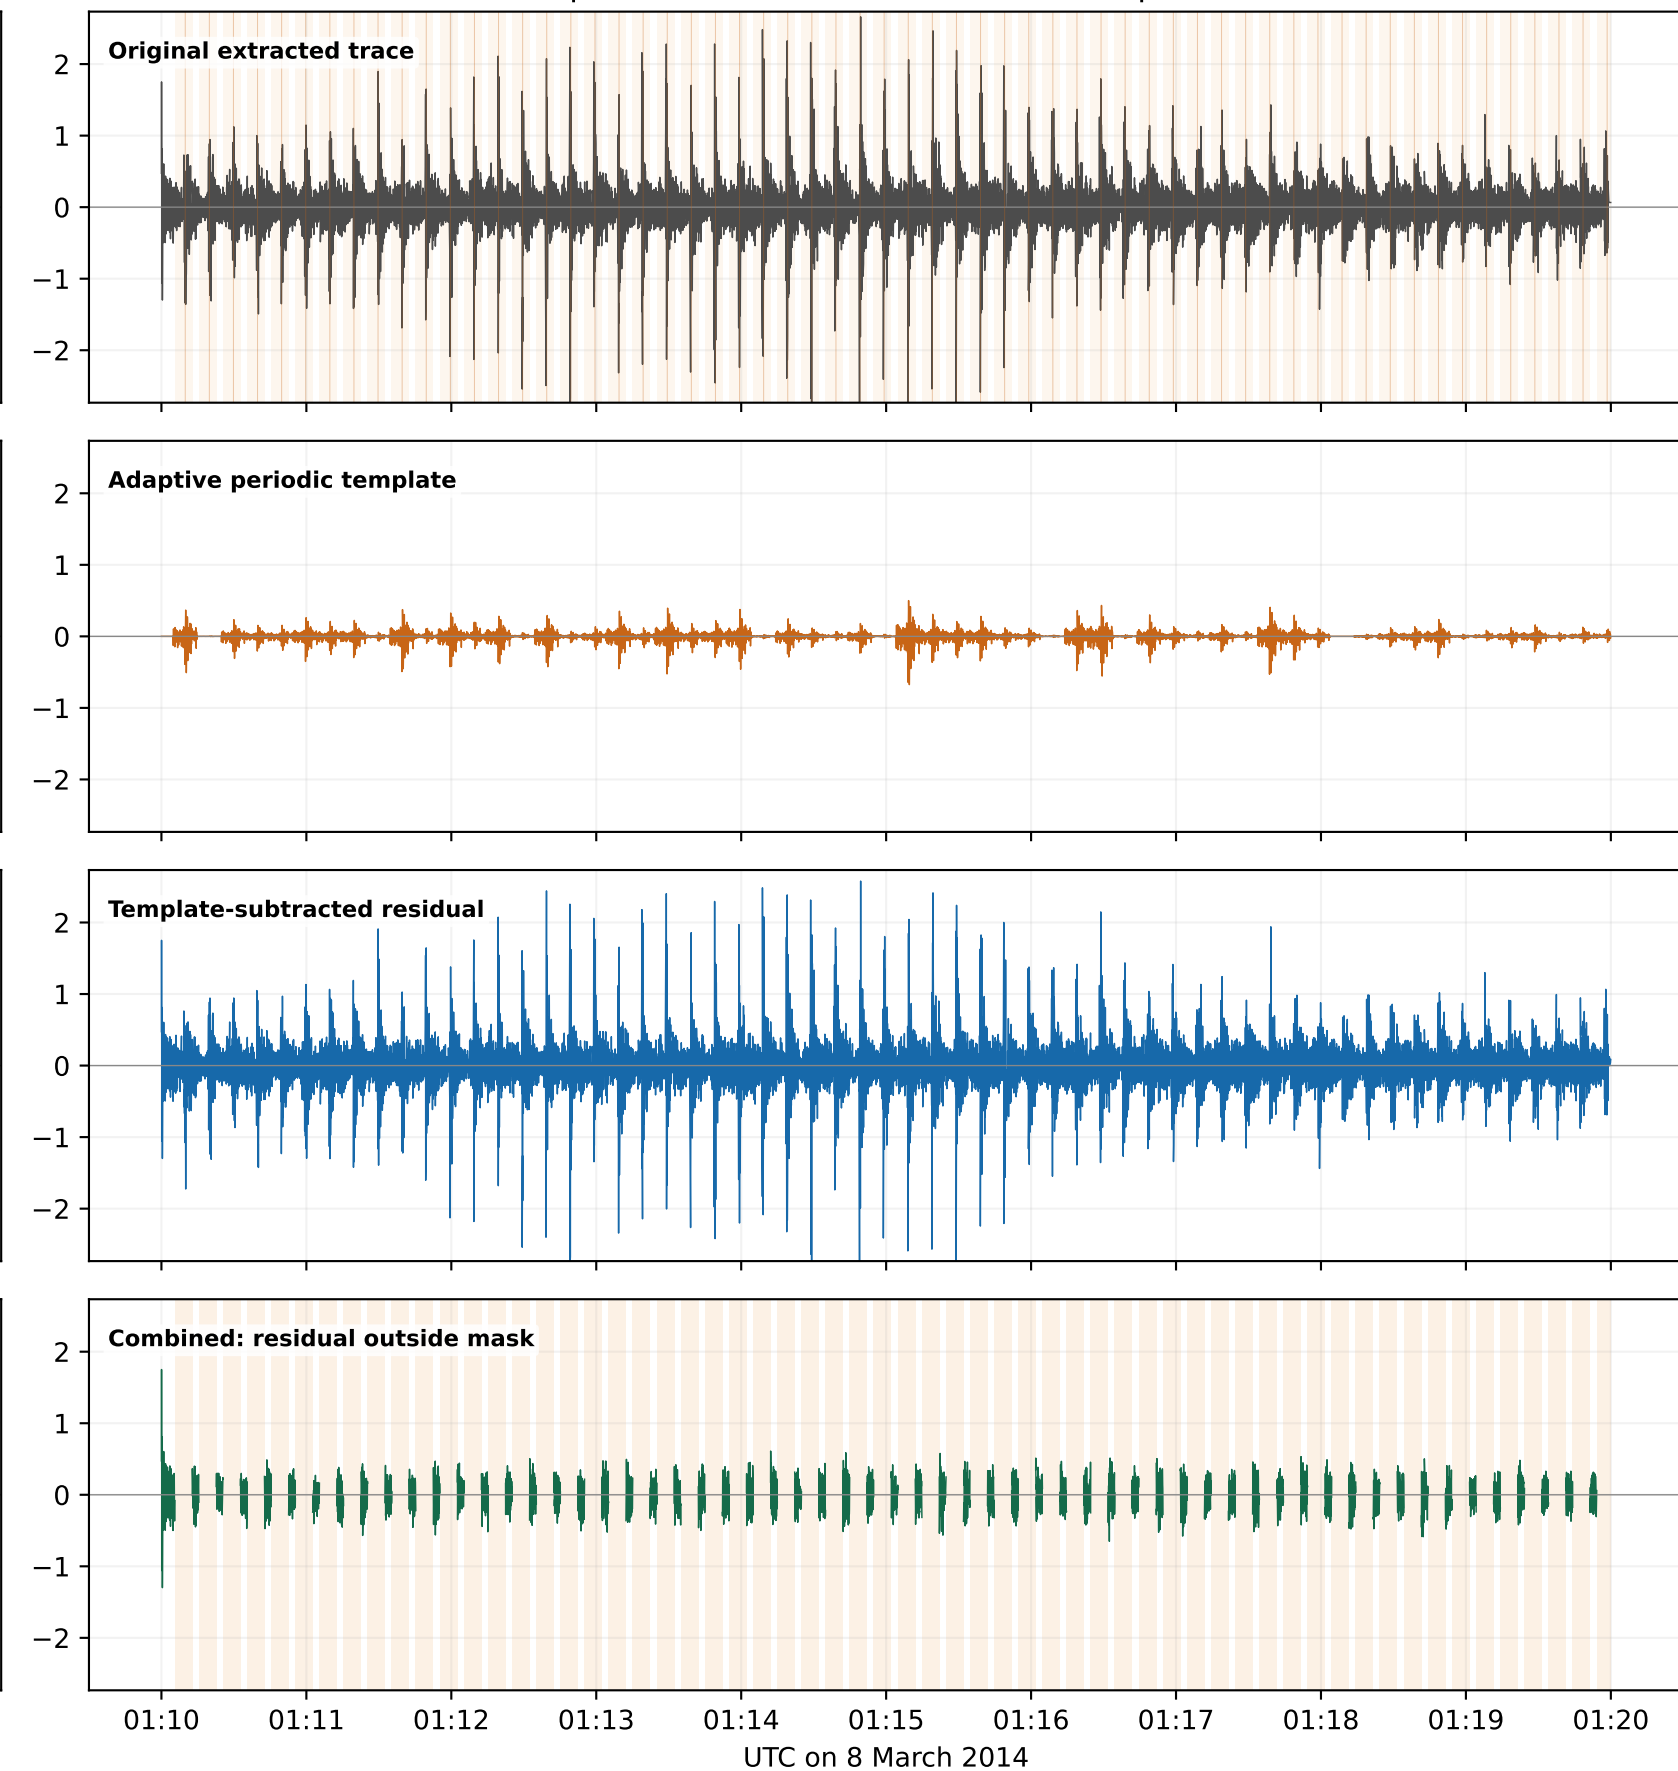

Figure 9e: 01:10–01:20 UTC
period 9.976 s; mask 71.2% of samples

Masking creates missing data; template subtraction creates a model-dependent residual. Neither reconstructs the raw three-channel record.
