

All pairings of the independently screened above-q99 publication-trace times

— integrated PDF 50/90/99% contours — seventh BTO arc range-difference band at 1.43–1.57 km/s, ± 5 s

The timing band uses only the H08S–H01W arrival difference; the second percentage additionally requires a common source during 00:19:37–00:49:37. No recovered bearing is available; H08S features remain in the periodic airgun context.
