

MH370 latitude marginals: model-conditional estimator and Davey et al. (2016)

00:11 UTC — one-turn model-conditional posterior

00:19 UTC — latitude marginal overlay

— One-turn + frozen continuation: 00:19 R600 BTO
- - Davey et al. (2016), Fig. 10.3 (digitized)

Canonical curves condition on one turn and a frozen 00:11–00:19 continuation; quantiles use raw particle weights. Davey permits richer manoeuvre histories and uses both final BTOs. The interval widths are therefore not comparable confidence claims.
