

Observation coordinates, not impact origins

Pléiades + Possible COSMO-SkyMed Radar (all four)
Equal model mixture | COSMO: 21 March assumption

* Ocean Infinity bands are approximate proposal polygons.
Southeast: recent-search context, not verified full sonar coverage.
Northwest: inferred possible remaining area, not a confirmed next boundary.
Sources and status checks: see accompanying provenance note.

— ATSB 2014-2017: published footprint
— OI 2018: approximate search outline
— OI 2025-2026: recent-search band*
— OI possible remaining / next band*

Conditional transport-compatibility PDF; no debris-identity probability or background false-detection denominator. Search overlays do not reweight the PDF.

Dashed grey curve: FL400 seventh-arc reference. Same probability surface and colour scale in both versions.
